Premier Specialty Co.

CHICAGO

MS-CS.

TO THE TRADE

WE call particular attention to the construction and material used in manufacturing our Mirrors. We use solid brass, nickel plated trimmings, highly finished, and the mirrors are of the finest quality French plate. If desired we can furnish trimmings finished in oxidized copper and brass. Mirror backboards, 14A, 13A and 3A, are new designs and finished mahogany, oak or white enameled. We can also furnish any other variety of wood to order. The metal frame on adjustable mirrors is constructed under our patent and it is attached to mirror and backing without the use of either brads or glue. A turn of the key into slot fastens glass, etc., securely in place, thereby making it dust and weather proof. All other mirrors are of High Grade order as per description. We guarantee every mirror and all other goods shown in this catalogue, and should you receive any not entirely satisfactory we would deem it a favor to have you communicate with us immediately, when all our efforts shall be directed toward making everything satisfactory.

¶ When ordering please give catalogue number and size, when so catalogued. On numbers 14, 13 and 3, kindly state the kind of finished wood desired on back-board.

TERMS:

¶ To those known to us, and others with established business and credit, our terms are thirty days from date of invoice or two per cent off ten days. All goods shipped f. o. b., Chicago. Please give shipping directions.

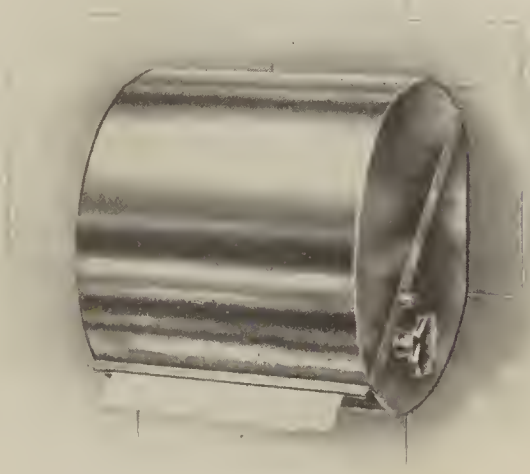
If glass towel bar in place brass nickel plated add $1.00.

Smith Toilet Paper Holder



PATENT APPLIED FOR

The Smith Toilet Paper Holder presents points of excellence that make it the most desirable article of the kind for use in public buildings. It is constructed for roll paper of any size or style and is operated by the thumb screw shown on the side. The thumb screw turns but one way and the paper is secured only through operation of this screw, the mechanism of the holder prevents the securing of paper through the usual process of pulling with its attendant wastefulness.

The absolute safety of the roll of paper, as well as the entire holding device is secured by a lock and key shown on side of the Holder.

The Holder is attached to the wall by screw or bolt, from the inside, it thus being impossible to detach it without first unlocking the metal case.

This Holder is simple in operation and so constructed as to preclude all tampering with contents as well as with the mechanism, the security of the mechanism making it difficult to put it out of order.

Brass, nickel plated, price..... $8.00

Smith Adjustable Spray Shower Ring

Patented Feb. 6, 1900

Plate 1

Plate 2

See description on opposite page.

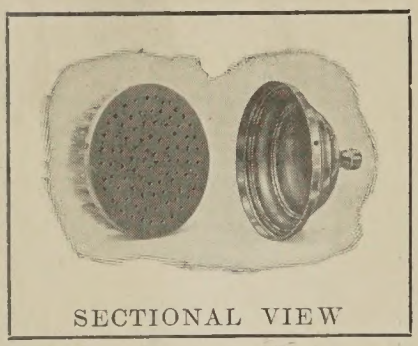
Smith Adjustable Spray Shower Ring

Illustrations on opposite page.

The Smith Adjustable Spray Ring presents features that claim for it the highest place in the requisites for health and comfort. The Smith Ring is constructed with pivoted arms, thus enabling one to take the full circular spray, or, with uplifted arms from which the current has been closed off, to spray half the body. The patient, whose physician has ordered him an abdominal spray, adjusts the ring at the waist line, with its arms uplifted, and enjoys the full benefit of the prescribed treatment. If the physician's order has been for spinal treatment, it is adjusted on the shoulders in a similar position, and the full force of the spraying directed to the spinal center. The closed ring may be adjusted by the regular morning bather at the neck, and an invigorating bath enjoyed. In the adjustment of this ring at the neck, or shoulders, the usual method of slipping over the head is done away with, and, in consequence, the dripping on the hair, which usually results. The ring may be adjusted while the water is circulating through it in consequence of the adjustable arms, it being unnecessary to slip it over the head. The ring can be used with any bath faucet. To use it, raise the arms as in Plate 2. Raising the arms shuts off the supply in those sections. Turn on water and obtain temperature required; this obtained, place around neck and lower arms, as per Plate 1, thus completing circuit.

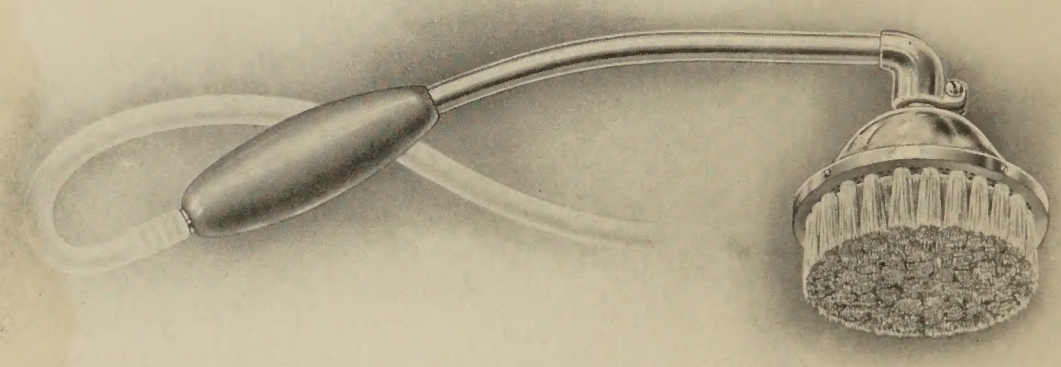
Smith Adjustable Spray Shower Ring, oval 11 x 14 inches, nickel plated, with 5 feet of rubber tubing..... $3.50

Smith Brush and Spray Combination



SECTIONAL VIEW

Bath Spray and Brush are constructed so that they can be used as Brush and Spray Combination or separately and have no equal for shampooing. Connections furnished suitable to attach to bath or basin faucets. The Brush consists of fine white French bristle, firmly fastened to a composition disc drilled with small holes between each knot of bristle, allowing water to spray out, making complete spray sprinkler. Force of spray can be regulated by pressure of water. Brush and spray can be easily detached from metal back, giving opportunity to thoroughly clean inside and open small holes in face of the shower should they become clogged, making a thorough Sanitary Spray Bath Bristle Brush.



BRUSH AND SPRAY COMBINED WITH HANDLE

Brush and Spray combination without handle	$1.75
Brush and Spray combination with handle	2.50
If with 5-ft. rubber tubing, either style, add	.40
If with 5-ft. rubber tubing and single faucet connection, add	.70
If with 5-ft. rubber tubing and double faucet connection, add	1.25
